How to revive someone in pacify farm

How to Beat The Farm (New Update)! By Swifty The Farm Update Guide! Step 1: Find bolt cutters in the house in front of you as soon as you spawn in games, floor (depends on spawn)Step 2: Find Angel Statue top floor of the house, front spawn (This will be used to revive /help people who were caught by the farmer) Step 3: Walk around the map open doors that need a bolt cutter (such as barn door and door, which has fertilizer bags) Step 4: Now ... there is an area at the rear corner of the barn where there is a water source, click on the 'E' on it and it will drive you some water. So after that you need to run and grab the fertilizer bags from the mini house/shed near the alley and poison the water. Step 5: Almost there.. Now you need to grab a frying pan from the kitchen of the house near the alley and hit any chickens around you and pick it up. You will then place the chicken in the poison water and entice the farmer to eat it. (This will weaken him!) Step 6: After feeding the farmer 8/9 poison chickens, the farmer will fall to the floor near the alley and you will need the wheelbarrow to escort him to the van. (AND THEN YOU WIN!) ps Sorry if it is not detailed enough ... I kinda rushed to write this whole guide;/ Note: This is only to be used to report spam, advertising and problematic (harassment, matches or rude) posts. I know how to revive yourself with brew, but how can I revive a friend who's dead? Need a brew to revive someone else? You have to keep a reviving increase in your totem 1 Like Oh cool. I haven't used totem since the first time you choose an alley planet. It uses up reviving increase when using? Correct. You can also craft more warp augments and choose landing sites on planets in the sky in the same way as you did at the beginning from sanctum Anyone know how Revive Brew works? Also, if you revive a player do they not get an EXP penalty? JakeTheHit: You have to keep a reviving increase in your totem Wait really? It's not a 'Run up to and hold E/Square' system? lck, well, that frees 5 skill points off this useless cooldown skill. The game sure has a lot of useless skills lol Nope, you have to put the increase in totem as you would with a warp increase drink brew, so if you die while this buff is still active, you respawn. Pretty stupid. 1 Like How It's At the Bottom: Release 188: Brews, Bombs, Rage, Focus, Revive and Atlases! New feature: REVIVE Defeated players who return to Sanctum will be affected by a Death Status Effect. Some attributes are reduced by 25% for 90 seconds. Players can now equip a Revive Augment in Totem to restore defeated players. The Reviving Skill is required to use Revive Augment in Totem. Players can choose to return to Sanctum or accept Revive if another player has performed a Revive. Acceptance of Revive will restore the player with a death penalty and without Death Sickness status effect. The revive ability can be upgraded in the skill tree to increase its strength. The Revive ability has a cooldown when it has been used and can be reduced with a skill upgrade. You need a totem, revive epic skill and revive Augment. See later release notes for some later changes in the Resume feature. Note: This is only to be used to report spam, advertising and problematic (harassment, matches or rude) posts. Burn yourself in the boiler and return to normal. 62.84% Common - 39.8 EXP You have not earned this performance yet Log in to see the progress of Pacify's farm update allowing players to join a new mission on a new map. This is a quick guide that explains how to find the secret ending of the update. Pacify is a horror game in which the player works for Paranormal Activity Helpers Incorporated (PAH) to rid a location of a supernatural device. The base game has the player entering an unusual old house to complete various objects to pacify and deal with the angry spirit of a little girl who will pursue the player (s). But the farm update added a brand new map to the game and paired it with a new enemy and new targets. Similar to the base game, there is a secret ending available for players to find. So here's a quick guide to how to find it. Incapacitating the farmer in Pacify As with any inference, the first thing the player has to do is defeat the monster and (preferably) put together clues that allude to monster origins. These hints mention a box that can be used to capture the evil that water is needed to make the poison effective, an old trinket that can activate the magic of the wind turbine, etc. But the first thing the players have to do to get into the house. On the first or second floor of the house should be some bolt cutters, which can be used to open doors throughout the map. This includes the barn where the poison is kept. In the attic is the old trinket mentioned in one of the notes. It is an angel statue that, when taken to the windmill, can heal wounded allies. Also, take one of the frying pans from inside the kitchen to kill chickens later. Behind the house is a freshwater source that can be activated. This is the water source players have to dump the poison to create green chickens. These green chickens can then be fed to the farmer to start weakening her. Once enough green chickens have been fed to the farmer she will give a loud wail and start slowly liming towards the spawning area where she will eventually pass out. Players will need to grab the wheelbarrow to move the farmer around. From here, players can choose which ending they want to pursue. Does Secret Ending trigger in Pacify So remember that the box is mentioned in the notes? The one that was said to trap evil and was probably the box where the gluttonous man's spirit was held? It is located in the cemetery close to the windmill. Take the farmer to that box. presumably sifons the evil gluttony spirit inside the box and seals it away. Then the secret ending can end by simply returning to the van empty-handed. But fun fact: there's a boss giant Easter egg available with this ending. When you bring the farmer to the evil-sealing box, place a green chicken inside it. Afterwards, a small light show should be - no joke - a giant green chicken on the farm. It's big, neon green and comically defenseless. The biggest problem should be catching up with it as it runs so fast. But like other chickens on the farm, the way to beat this creature is by hitting it with frying pan. Although, for obvious reasons, this chicken will require several whacks before it keel. But when the chicken boss clucks out to his final rest, the players can then still approach the van and find their secret ending.
